Inframon Consulting

“Inframon Consulting Services is the premier worldwide System Center focused consultancy. We specialise in helping IT organisations plan, implement and customise Microsoft System Center based solutions that cross people, processes and technologies.”

At Inframon we understand that effective solutions encompass not only technology but people and processes, as such we have developed a number of tested methodologies and best practices to deliver your Microsoft System Center implementations on time, in budget and to scope.

The Microsoft System Center suite consists of a highly specialised set of technologies that if implemented correctly can deliver instant and tangible business benefits to your organisation. Our solutions are designed to meet your business requirements and deliver maximum value to your end-users whilst being fully integrated and embedded into your organisation.

Inframon are entirely focused on the Microsoft System Center suite of products and therefore provide consultants that are deep subject matter experts and have extensive field experience and knowledge, helping you to get it right first time, every time.
